

Testing side notes:

Due to the time constraint, the following capabilities could not be tested as we tried to explore and test sufficient functionalities for each capability.

/todos/:id/tasksof

Test capability to POST an instance of a relationship named taskof between todo instance :id = 1 and project instance represented by the id in the body of the message

Test capability to GET all updated project items related to todo with given id = 1, return with 200 status OK and correct list of projects

/todos/:id/tasksof/:id

Test capability to DELETE a relationship named taskof between todo and project using the :id = 3 and return 200 OK.

Test capability to GET all updated project items related to todo with given id = 1, check if relationship named taskof does not exist for instance :id
